Voice AI vs Manual Calling — Funnel Report

How the calling process takes place

AI Lead Funnel — today

Research finding

1 Dialer number is not rotated

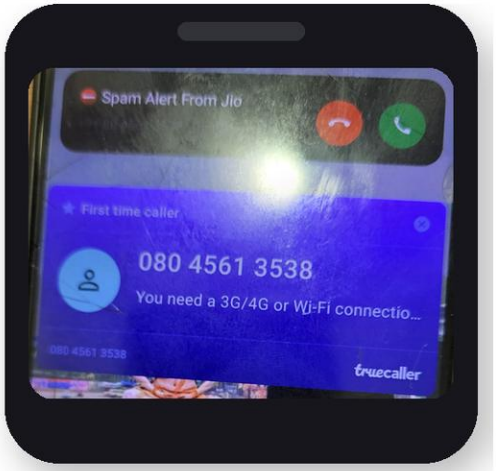

Manual calls use an Airtel dialer that changes numbers often.

> **So what?**
> The number shows as spam, so the customer doesn't pick up.

2 Internet-usage alert while connecting

A 3G/4G or Wi-Fi message pops up on the incoming call.

> **So what?**
> The customer distrusts the call and rejects it.
